Field Guide Worksheet 2  
Species Observation

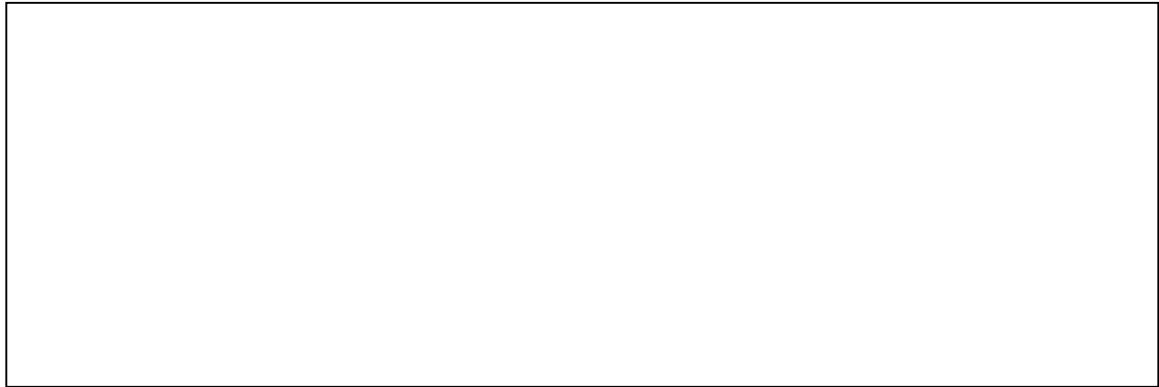

Name \_\_\_\_\_

Date \_\_\_\_\_

Did you observe a plant or an animal?

\_\_\_\_\_

Draw what you saw here. Show as many **details** as you can!

Does your plant or animal have any **distinguishing characteristics** (things that make it special or unique; if it's a bird, what color are its feathers? How big is it)?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

Make a guess about what species **exactly** you observed. (If you saw a bird, what type of bird is it, a hawk? A sparrow? A crow?) Use a field guide if you have one.

\_\_\_\_\_

\_\_\_\_\_

What did you notice about where you found your **specimen** (the thing you are observing)? Describe the area as best you can.
